

Solar Panel

Use Nordic Gamekeepers Solar Panel and let the sun power up the battery. Minimize the time when you have to load the battery or let the Solar Panel load the battery to 100%. The Solar Panel works with all feeders and is a 5w solar panel with a 2 meter cable.

Assembly on Nordic Gamekeeper feeders:

Mount the Solar Panel in pre-drilled holes in the feeder and pull the cable to the battery. Connect the cables to the Solar inputs + and - on the FeedCon.

Assembly on other feeders:

Mount the solar panel facing south in 45 degrees on the top of the feeder.

Connect to FeedCon:

- Attach the red cable to + Solar input in FeedCon.
- Attach the black cable to - Solar input in FeedCon.
